

ACRYLIC SEALANT

Anabond 777 acrylic sealant is a single component when cured produces a flexible seal with non-yellowing properties, while curing forms a tough and resilient bond in civil engineering applications.

SALIENT FEATURES :

- One component, easy to apply.
- Good adhesion on building materials.
- Durable and ageing resistance.
- High flexibility.
- Paintable.

APPLICATIONS :

- Joint sealing between windows and door frames.
- Expansion joints between concrete building component of smaller size.
- Water proof sealing of air conditioning room, clean room, cold storage, laboratory etc.
